Size Changes

Items in Red are flagged as Transitions Issues

Segment	Field	Description	D.0 Change Comment
Response Status	526-FQ	Additional Message Information	The field length was reduced from 200 to 40 bytes and repeat functionality was added to allow for multiple messages. Messages with a length greater than 40 bytes will need to utilize 131-UG to indicate it is a continuation. For more detail and examples on the correct use of the message segment in the response please refer to section 28.2.5.3.2 Structured messages in the Telecommunication Standard Implementation Guide Version D.0.
