WebMD's MEMS Accelerates the Medicaid Eligibility Process

Establishing Medicaid eligibility can be complex, and the process of managing numerous applications at once can put undo stress on a healthcare provider's staff. **WebMD Business Services'** MEMS (Medicaid Enrollment Management System) helps streamline the Medicaid application process and provides efficient tools to ensure applications are accurate from the beginning.

Let MEMS Help You Work Smarter, Not Harder

WebMD knows that time spent by healthcare providers is valuable. That's why **WebMD's** MEMS comes packed with features that all work in concert to simplify the Medicaid application and eligibility process.

- On-Screen Prompts to Automate Data Entry
- Built-In Error Checking to Prevent Invalid Entries
- Tracking of Applications from Beginning to End
- Tools to Coordinate Staff Resources
- Letter Series for Complete Patient Communication

The end result is **more complete and accurate Medicaid applications** and a positive impact to the bottom line.

Add MEMS Scan & Eliminate the Paper

Adding MEMS Scan to **WebMD's** MEMS lets providers submit applications electronically to participating state and municipal Medicaid bureaus. This creates a virtually paper-free Medicaid application process from initial patient contact all the way through approval.

VALUABLE ADVANTAGES

- Streamlined Medicaid Application Process
- Improved Documentation Gathering & Patient Communication
- Potential to Increase Medicaid Application Approval Rate
- Faster Application Submission & Approval
- Fewer Uninsured Patient Services
- Positive Impact to Accounts Receivable

TECHNICAL REQUIREMENTS

- Windows 2000 Professional OS
- 500 MHZ
- 128 MB of RAM
- Frame Relay with Router
- 56 kbps modem or DSL, Cable modem, ISDN, T-1 or other high speed connection

Additional Requirements for Image Scanning:

- Internet Explorer 5.5 or later
- 10 GB Hard Drive
- A high-speed Scanner with a 20-page multiple sheet feeder

MEMS & MEMS Scan Get More Done - Faster

MEMS and MEMS Scan work seamlessly to quickly and accurately complete the application process from beginning to end. Tracking, error checking, organization, and patient communication features help avoid missteps prior to submissions, resulting in more applications approved the first time.

Electronic submission and approval accelerate the round-trip application process so that healthcare providers can spend more quality time on what's most important - *their patients*.
