

CMS October 2007 Notice NPI Potential Issues Related to Clearinghouses and Billing Service Practices

Emdeon Business Services has received a number of requests from customers concerning CMS' recently released statement about NPI potential issues related to clearinghouses and billing service practices.

Emdeon Business Services can confirm that its claims clearinghouses forward on to all Medicare payers any and all NPI data received from submitters that pass the 10 digit numeric and LUHN check digit validation.

Background:

In a communication addressed to all clearinghouses and vendors, CMS recently stated:

Potential Issues Related to Clearinghouse and Billing Service Practices

As part of efforts to fully implement the NPI, Medicare FIs, carriers, and A/B MACs have begun calling providers who are not sending their NPI on claims or are sending incorrect NPI information. It has come to CMS' attention that:

- Some Clearinghouses may be stripping the National Provider Identifier (NPI) off the claim prior to its submission to Medicare for claims processing. Clearinghouses may be adding the NPI back onto the Remittance Advice, so that providers are unaware that NPIs are being removed prior to being sent forward.
- Some billing services (or "key" shops) are not putting the NPI on the claim, contrary to provider instructions.
- Some clearinghouses are not forwarding, to providers, carrier NPI informational claim error messages designed to help the provider understand the problems Medicare is encountering in attempts to crosswalk the NPI to legacy identifiers.

Medicare Contractors are turning on edits to begin validating the NPI/legacy pair against the Medicare NPI Crosswalk. If the pair on the claim is not found on the crosswalk, the claim will reject. Stripping the NPI submitted by a provider from the claim adversely affects Medicare provider incentive cash flow, payers that receive crossover claims, and the efforts of Medicare to fully implement NPI.

If you are a Clearinghouse or billing service that is stripping or not sending the NPI, Medicare would like to better understand the reasons behind this practice as well as the expected timeframe during which this will continue to occur. Therefore, we ask those willing to discuss this problem with CMS staff to please contact Aryeh Langer at Aryeh.langer@cms.hhs.gov or Nicole Cooney at Nicole.cooney@cms.hhs.gov before October 10, 2007.
