Emdeon Medicare Manager/DDE Plus™

Manage Medicare Part A claims with ease

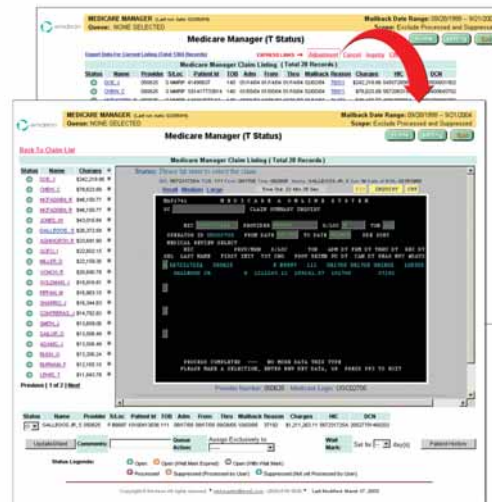

Emdeon Medicare Manager/DDE Plus™ simplifies claims management for Medicare Part A providers. Its effectiveness stems from the ability to view, prioritize and sort claims by numerous methods and then correct claims within the DDE system.

Make a positive impact on your bottom line

Emdeon Medicare Manager/DDE Plus employs a direct interactive approach to eliminate costly, time-consuming manual searches for claims within the DDE system. It can sort Suspended (S-Status), Returned-to-Provider (T-Status), Rejected (R-Status), Paid (P-Status) and Denied (D-Status) claims by the highest dollar value to highlight the most valuable claims first. The Internet-based DDE Plus connection then allows you to easily correct specific claims within the Medicare DDE system.

Reduce denial rates and resolve backlogged claims

Medicare Manager provides excellent assistance in managing your Medicare Part A claims inventory. Help with Additional Development Requests (ADR) associated with S-Status claims can reduce denial rates. In addition, identification and resolution of highest priority T-Status claims can help turn backlogged claims into revenue. You can also use Medicare Manager to monitor P-Status (Paid) claims reimbursement and expedite secondary claims processing.

How does Medicare Manager/DDE Plus work?

Emdeon Medicare Manager displays the number of claims in each category (type of bill, error location, reason code, etc.) and the total dollars involved. Claims can be sorted by dollar amount, mail-back date, claims count, error location and type of bill. Each claim can be drilled down to show specific information related to errors, and collection can even be assigned to resources within your organization.

When used in conjunction with Medicare Manager, DDE Plus can boost productivity even more by moving directly to those claims in the Medicare DDE system for quick, easy correction.

Emdeon is a leading provider of revenue and payment cycle solutions that connect payers, providers and patients to improve healthcare business processes.
