Health Information Exchange

Emdeon HIE is a service that connects physicians, hospitals, pharmacies and labs to securely exchange information when it can save the most money and provide the most benefit – right at the point-of-care. Emdeon makes the process of sharing information easy, efficient and affordable.

Revenue Cycle Management

Emdeon Office Suite streamlines the everyday tasks of physician practices by integrating eligibility and benefits verification and claims and payment management all into one easy-to-use application. Reporting and analytics tools give you complete visibility into the claim lifecycle so you can see where your revenue is from point-of-submission through payment.

Meaningful Use

The HITECH Act, part of the 2009 economic stimulus package, aims to encourage eligible providers to adopt electronic medical records by offering incentive payments to those who use certified EMR technology. Eligible providers must report that they meet the Meaningful Use requirements in order to receive stimulus funds.
